

# Streamline Claim Processes with *FastAttach*™ software

Connecting Disconnected Data®

## Improve Your Revenue Cycle with Electronic Claim Document Submission

Today's hospitals are challenged with maximizing efficiencies in all that they do. Identifying audit risks as well as gaps in processes that create unnecessary paperwork are key areas for improvement in many healthcare organizations. The *FastAttach* software from Vyne Medical® can help mitigate these concerns.

The *FastAttach* solution solves the problem of managing cost and time delays associated with the retrieval and transmission of medical documentation between providers and payers. *FastAttach* is an encrypted, Internet based electronic attachment software for submitting requested additional documentation to health plans and payers.

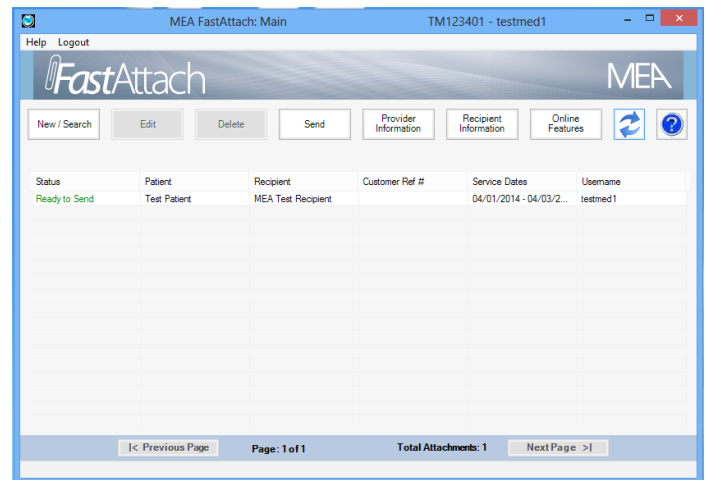

The *FastAttach* software has earned Certified status for information security by the Health Information Trust (HITRUST) Alliance. With the HITRUST CSF Certified Status, the *FastAttach* solution meets key healthcare regulations and requirements for protecting and securing sensitive private healthcare information.

## How Does the *FastAttach* Software Work?

Vyne Medical provides an electronic information exchange that is both secure and readily accessible to payers and providers in both large hospitals and smaller medical practices. No more lugging stacks of records from place to place for shipping in response to claims denials. Instead, use the *FastAttach* software to package your documentation in an "electronic envelope" and simply transmit all of the information required to adjudicate a claim in a secure, trackable manner with just a few clicks.

## Search Payer Requirements Prior to Submission

Additionally, Vyne Medical offers the *FastLook* service, an integrated solution that helps eliminate confusion around individual payer attachment requirements for claims adjudication all located in one central site. With *FastLook*, providers can search by payer name and procedure code to determine if an attachment needs to be sent and if so, the exact parameters of what needs to be sent. Knowing this up-front eliminates the hassle of sending unnecessary attachments and can be a real time-saver.\*

## The Costly Truths of Paper Claim Documentation

### For Providers

- Staff often spends as long as 20 minutes retrieving, copying, assembling and mailing a single paper claim.
- Delays in payments and increased DAR are inevitable
- Often deadlines have come and gone before claim requests can be replied to resulting in write-offs
- Manual "detective work" is required for tracking and following up on paper attachments.

Narrative

*Supporting documentation can be easily attached via a wide variety of image capture methods.*

*The FastAttach service also supports multiple file types to accommodate images and documents.*

## For Payers

- It is time consuming and expensive. From the postal fees, to the labor costs associated with managing the process, paper correspondence lengthens turnaround times and reduces first-pass adjudication rates.
- Paper processes lead to lost claims and hassles associated with reimbursements
- Tracking paper claims is nearly impossible
- Reduces time tracking claim status
- Eliminates "lost" attachments
- Reduces denied and pended claims
- Eliminates paper-based workflow
- Reduces postage and fax charges
- Provides secure, compliant transmission

## Benefits of the *FastAttach* software:

- Improves acceptance rates for claims requiring supporting documentation
- Faster reimbursements
