

Connecting Disconnected Data®

FastKapture® App Provides Mobile Image Capture

What is *FastKapture*?

Whether you need to send esMD audits to Medicare, or supporting documentation to a payor, Vyne has you covered. Introducing the *FastKapture* patented image capture application for mobile devices.

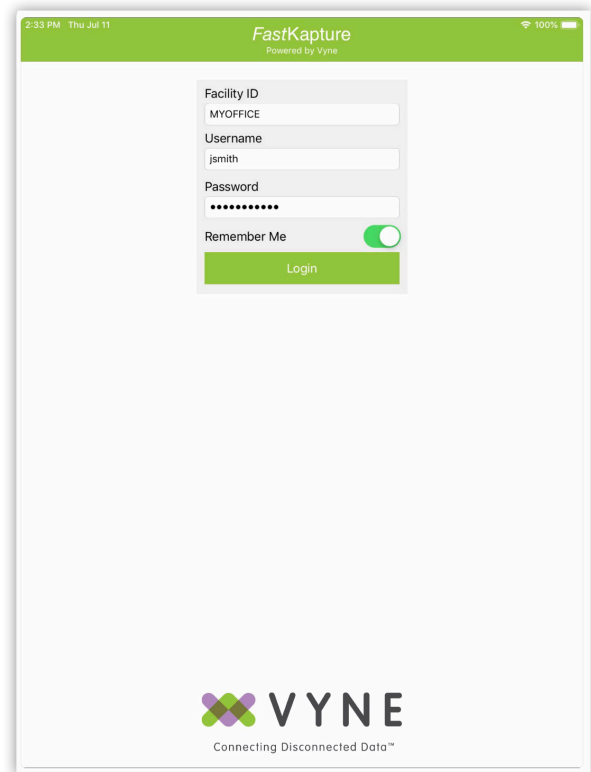

The *FastKapture* app simplifies the task of medical image capture and transmission with a secure easy-to-use smartphone application. Images are not stored on your mobile device, eliminating the risk of compromised protected health information. This new mobile app allows you to use the camera on your portable device to securely capture and send indexed medical images and documents to Vyne Medical's information exchange engine.

Seamless Integration with *FastAttach* software

The *FastKapture* app works seamlessly with the *FastAttach* software to offer another convenient method for securely capturing and transmitting documentation. With the *FastAttach* software, you can create an electronic envelope containing any requested documents needed for claim adjudication by way of:

- Mobile device camera
- File import
- Print capture
- Scanned images
- Screen capture

Once the documentation is submitted, Vyne Medical's information exchange engine routes the information to the appropriate stakeholder for retrieval.

Download *FastKapture* in the App Store on your mobile device.

The *FastKapture* App Allows You To:

- Capture, index and transmit documents and images from your mobile device
- Reduce security risks normally associated with mobile capture methods
- Eliminate the need for a scanner
- Improve your revenue cycle
- Access images online 24/7 through your existing *FastAttach* account

Available for most Android and Apple devices!

FastKapture is a free app download that works with Apple and Android devices including smartphones, ipads and tablets.

With the *FastKapture* app you can:

- Simplify the secure capture and transmission of image documentation via your mobile device
- Utilize your existing mobile device for image capture instead of juggling films and paper files
- Integrate your mobile device with *FastAttach* to streamline your workflows
- Streamline management of your claim attachments

Experienced Customer Support

If you have any questions about *FastAttach*, Vyne Medical's experienced technical and customer support teams are here to help. We provide continuous service to improve your workflows including best practice guidance on how to simplify document capture and image review.
