

Product Manager-Connected Care

📍 Remote

Posted: October 5, 2021

Reports to: SVP of Strategy & Platform

General Summary:

We're looking for a passionate, mission-driven Product Manager to join us in creating a tool to coordinate clinical care. The ideal candidate is a self-starter who thrives in an entrepreneurial environment and who is driven to deliver business results. We want someone with a strong product background who is motivated to tackle meaningful problems in healthcare.

The Product Manager (PM) is responsible for driving revenue growth, gathering product and customer requirements, ruthlessly grooming the backlog, and working closely with engineering, sales, and marketing to ensure that customer and revenue objectives are met. The PM is also accountable for developing user stories, training, competitive analysis, and pricing and is critical to the overall success of creating a market-driven product.

Responsibilities:

- Proven Ability to drive growth in product revenue and utilization
- P&L and Forecasting management for parts of product or whole product; awareness of competitors and what is required for success in the market
- Develops product roadmaps based upon business priorities and communicates that roadmap to senior leadership
- Gathers data to define product features, develops user stories and detailed requirements, and ensures stories are 'ready' for development to start work (including acceptance criteria)
- Manages and prioritizes the product backlog, including backlog grooming
- Responsible for release tracking and accountable for solution delivery
- Develop and maintain solution delivery timelines and plans
- Works with customer facing teams and stakeholders to ensure readiness and excellent execution
- Other duties as assigned

Skills and Experience Required:

- 3+ years in Software Product Management (or related positions) in the Health Care Industry
- Passion for customers and a demonstrated focus on customer experience
- Energy, motivation, and commitment to drive to results in a challenging, fast-paced environment
- Growth Mindset
- Demonstrated ability to meet commitments, build consensus, negotiate resolutions, and garner respect from other teams
- Ability to work with the team and the stakeholders to continuously improve the quality of the product backlog and everyone's understanding of the items it contains
- Excellent oral, written and interpersonal communication with both technical and business audiences
- Experience with defect tracking management systems

SECURITY ROLES / RESPONSIBILITIES:

- **PHI (internal, by exception)** -This position may have access to and be responsible for the security of PHI/PI on an incidental basis.
- **PHI (by customer request)**- This position may have access to and be responsible for the security of PHI/PI on a daily basis.
- **Support Admin, e.g., client-facing** - This position may have access to and be responsible for supporting customer technical needs, which may include securing customer's sensitive technical information.
